**Books: 'Complexité (Philosophie)**

Since the theoretical and experimental work of August Weismann 1893 excluded the possibility of inheriting acquired phenotypic characters by

human organisms, Lamarckism, as a general explanation of evolution, has been overshadowed in modern biology. In 1942, Conrad Waddington used the term epigenetics to describe the area of biology that studies the causal interactions among genes that build the phenotype. Actions can be intentional and purposeful, since an actor can exploit natural laws to reach chosen goals.
