## Neurological disorders

Brain disorders include any conditions or disabilities that affect your brain. A neurological disorder can be caused by either a disease, such as , or a trauma or injury to the nervous system.

## Neurologic Disorders

Mechanism of functional neurological symptoms.

## Neurological Disorders in Children

**Craniosynostosis** A birth defect of the brain characterized by the premature closure of one or more of the fibrous joints between the bones of the skull called the cranial sutures before brain growth is complete. Other features may include feeding and respiratory problems, developmental delay, mental retardation, hearing impairment, awkward gait, flat feet, and heart and kidney involvement.

## Neurological Symptoms

What is vascular insult to the brain, and how do we evaluate it under? These examples illustrate the nature of this area of mental functioning.

## National Neurological Conditions Surveillance System (NNCSS)

Also called Asperger's syndrome, Asperger's disorder, Asperger's or AS is one of several autism spectrum disorders ASD characterized by difficulties in social interaction and by restricted, stereotyped interests and activities.
