

Epstein-Barr virus gene expression in the pathogenesis of Hodgkins Disease and other EBV-associated diseases.

University of Wolverhampton - Diagnosis of Epstein

Description: -

-Epstein-Barr virus gene expression in the pathogenesis of Hodgkins Disease and other EBV-associated diseases.

-Epstein-Barr virus gene expression in the pathogenesis of Hodgkins Disease and other EBV-associated diseases.

Notes: Dissertation (Ph.D.) - University of Wolverhampton 1996.

This edition was published in 1996

Filesize: 33.910 MB

Detection of Epstein

These treatments include immune therapy approaches, interferons, and small molecule targeting aspects of virus biology.

Targeting the signaling in Epstein

Defective NKT cell development in mice and humans lacking the adapter SAP, the X-linked lymphoproliferative syndrome gene product.

Epstein Barr Virus

The effects of short-term corticosteroid therapy on the symptoms of infectious mononucleosis pharyngotonsillitis: a double-blind study. Vokes EE, Liebowitz DN, Weichselbaum RR. Most cases are of B cell origin and tend to be located in the pleura with local invasion.

Epstein Barr Virus

Infectious mononucleosis with severe thrombocytopenic purpura. The action mechanism of this drug is the elimination of EBV episomes in EBV-positive Burkitt lymphoma cell lines. Glavina-Durdov M, Jakic-Razumovic J, Capkun V, Murray P.

Detection of Epstein

The patterns of antibody responses to EBV infection are illustrated in. An update on Burkitt lymphoma: A review of pathogenesis and multimodality imaging assessment of disease presentation, treatment response, and recurrence. Stevens SJ, Verkuijlen SA, Hariwiyanto B, Harijadi, Paramita DK, Fachiroh J, Adham M, Tan IB, Haryana SM, Middeldorp JM.

Epstein

Straus S, Cohen JI, Tosato G, Meier J. Subsequent discovery of an EBV protein kinase led to controversy over which kinase is responsible for acyclovir and ganciclovir phosphorylation, but it appears that in infected cells, the EBV protein kinase is the enzyme required for activity of acyclovir and ganciclovir.

Epstein

The EBV DNA copy numbers are shown per milliliter of plasma. The pathogenesis of this tumor is not well understood. Preiksaitis JK, Pang XL, Fox JD, Fenton JM, Caliendo AM, Miller GG; American Society of Transplantation Infectious Diseases Community of Practice.

Epstein Barr Virus

Wang also uses primate herpes viruses closely related to EBV in natural infection of New World or Old World nonhuman primates that have been identified, cloned, and sequenced, and the evolution of these related viruses provides unique insights into the molecular biology of this oncogenic herpes virus genus. Weinstock DM, Ambrossi GG, Brennan C, Kiehn TE, Jakubowski A.
