scholarship from the IFEA.

## On the Anatolian Origins of Some Late Bronze Egyptian Vessel Forms

Étude critique des sources égyptiennes Du début de la XVIII e à la fin de la XIX e Dynastie , BdE 22, Le Caire. There also is a Levantine stone type, called lugged-flask or lugged-pyxis, on which the handles are very small. Individual chapters present the key textual and material sources underpinning the historical reconstruction, paying particular attention to the most recent archaeological finds and their impact on our historical understanding of the periods surveyed.

Königliche Miniatursalbgefäße eines undokumentierten Fundkomplexes Teil II.

**Contents of Volume 62 on JSTOR**

The fact that very ancient Anatolian shapes were imitated and transformed in North Syria, the Levant, the Aegean and Egypt, to become one of the most characteristic forms of Egyptian luxury vases, provides significant evidence of a different sort: it reflects the scope of artistic influences, and to some extent, counterbalances the archaeological data for Near Eastern luxury items, whose paucity blurs our perception of artistic exchange and influences.
