THE BEST Dessert in Frankfurt

Vicugnas live in one of the driest deserts, the Atacama.

Desert Biome

Help your students understand the gravity of extinction with these classroom resources. Some desert plant species have a short life cycle of a few weeks that lasts only during periods of rain. When water is available, the stem swells so that the grooves are shallow and the ridges far apart.

Desert

Desert biomes can be classified according to several characteristics.

Desert

The heaviest rainfall of the spring is usually in April or May. All except the jack rabbits are burrowers.

THE BEST Dessert in Frankfurt

The soil can range from sandy and fine-textured to loose rock fragments, gravel or sand. They tend to be small, thick and covered with a thick cuticle outer layer. Its flowers are pollinated by bats, bees, and white-winged doves.
