## Implementing the SDGs in Nigeria's Slums

Using a standard segregation index the index of dissimilarity , which varies from 0 to 100, European ethnic groups rarely had indexes of more than 60 Massey, 1985; Massey and Denton, 1992. For this reason, comparisons over time may be based on anchoring the poverty threshold at a specific point in time for example, the height of an economic crisis. A high level of segregation on any single dimension is problematic because it isolates a minority group from amenities, opportunities, and resources that affect socioeconomic well-being.

## Rural Response to Coronavirus Disease 2019 (COVID

At the slower rate of change prevailing from 1970 to 1980, it would take until 2067.

## Quality of Housing

However, housing is important for many aspects of healthy living and well-being.

## Poor People Living in Poverty

Social and economic conditions in neighborhoods may improve health by affording access to employment opportunities and public resources including efficient transportation, an effective police force and good schools. Some of these houses were placed on elevated platforms and all were connected by a staircase located in the center of the home.
