Effects of Placer Mining on the Invertebrate Communities of Interior Alaska Streams on JSTOR

By restoring these habitats, which were not damaged by the hydrosystem, the program helps compensate for the existence of the hydrosystem. When an inadequate EA is contested as a matter of fact, review should then proceed through the administrative process and a question of adequacy can be resolved.

Birch Creek Placer (MRDS #10003016) AU, SN

BLM evaluates the cumulative impacts of all mines, but can only manage within its jurisdiction.

Effects of Placer Mining on the Invertebrate Communities of Interior Alaska Streams on JSTOR

The appeal was initially submitted and heard by this panel on August 6, 1987. Others occur on stream terraces, well above the present valley floors. Before GOON, ANDERSON and BRUNETTI, Circuit Judges.

Klondike River 1898

The TMDL for the remaining impaired areas was completed in August 2010 and implementation of the TMDL focuses on dock and harbor BMPs to minimize any new petroleum hydrocarbon inputs to the area. The statement in the BLM Manual which assumes the operator's best conduct is insufficient to establish a policy.

Stream and floodplain restoration in a riparian ecosystem disturbed by placer mining

A list of the EIS preparers is included in Chapter Five.

Total Suspended Solids Effects on Freshwater Lake Biota Other than Fish

The environmental consequences of all the alternatives are analyzed and presented. Washington, , 1356-57 9th Cir.

Klondike River 1898

After balancing the equities, the court allowed the 1987 mining season to go forward but enjoined BLM from approving any placer mines in the four watersheds until the EIS was prepared. The size of a placer mine can vary greatly--from very large mines using bulldozers, pumps and heavy equipment, to small one-person pick and shovel operations.
