Hence, electricity generation accounts for about one half of Australia's energy-related greenhouse gas emissions. Australia has a higher dependence on fossil fuels for electricity production 90% than most other countries or regions in the world. Over half of the total energy combusted domestically 53% was used either directly or indirectly by households through consumption of products.

1992

The 1992-93 Topps Basketball Set contains 396 standard-sized cards that issued issued in two series. Chapter 4 contains more details.

British Columbia Public Accounts 1992

A further 23% of energy-related emissions were generated in the production of goods and services for export. NET ENERGY SUPPLY AND USE, AUSTRALIA-1997-98 ENERGY USED INDIRECTLY BY FINAL CONSUMPTION Diagram 1 presented information for 1997-98 on the overall supply and use of energy in Australia, the bulk of which is exported as raw material.

#1992 93/9 Real Estate Settlement Accounts

These imports have increased significantly since the deregulation of the Victorian electricity industry in the mid 1990s. Factors considered in setting Australia's targets were its current dependence on fossil fuels and relatively high economic and population growth rates.

British Columbia Public Accounts 1992

Australia's total energy supply is comprised of Australian production of energy, plus imports of energy products, with imports contributing only a small amount to Australia's total energy supply less than 10%. AUSTRALIA AND THE REST OF THE WORLD Table 4 shows key energy indicators for major world regions and Australia for 1997, based on statistics from the International Energy Agency IEA. Chapter 4 contains more detailed analyses of energy demand induced by the consumption of different product types.
