

# Basic biochemical methods

## Wiley-Liss - Biochemistry lecture 1

Description: -

-

Printing -- Specimens.

Printing -- England -- History -- 15th century.

Biochemistry -- laboratory manuals.

Biochemistry -- Laboratory manuals. Basic biochemical methods

- Basic biochemical methods

Notes: Includes bibliographical references and index.

This edition was published in 1993

Filesize: 25.51 MB

### Biochemistry

Čermáková, Zdeňka; Gottwaldová, Jana; Dastych, Milan; Adam, Zdeněk; Zahradová, Lenka 2013-10-01 00:00:00 DOI 10. Such a substrate is called a chromogenic substrate. Since antigen immobilization in this step is due to non-specific adsorption, it is important for the total protein concentration to be similar to that of the antigen standards.

### Concepts in Biochemical Pharmacology

Newer techniques, such as real-time PCR, may replace Southern blotting in the future. Indirect ELISA is the method of choice to detect the presence of serum antibodies against human immunodeficiency virus HIV, the causative agent of AIDS.

### Biochemistry Techniques

This undergraduate course deals with the different biochemical techniques such as and chromatography to gain knowledge on the biomolecules such as, lipids, carbohydrates, nucleic acids, and their functions.

### BCMB 203: PRINCIPLES OF BIOCHEMICAL TECHNIQUES

A simple and common form of chromatography use filter paper.

### Biochemical Techniques

ELISA allows the detection of an analyte substance whose presence is being quantitatively and qualitatively analyzed in a liquid sample. Large samples can be pumped through the column and the separated fractions can be collected for further experiments, so this is preparative chromatography as opposed to analytical chromatography. All other materials in the waste stream should be removed prior to the process.

### Biochemistry lecture 1

The resulting sugar compounds and water are sent to a fermentation unit where yeast is added. The neuromodulatory role of neurotensin is supported by its actions through specific high-affinity binding sites in discrete regions of the mammalian central nervous system.
