What does the UK energy white paper mean for the North Sea?

Wood recommended six strategies in all, covering exploration, asset stewardship, regional development, infrastructure, technology and decommissioning. The UK government has lost over £250 billion in 13 years by giving generous tax breaks to North Sea oil companies, according to an expert report. It also remains to be seen whether the regulatory aspects of MER UK will later be supported by any further measures to increase the attractiveness of the UKCS as against other parts of the North Sea for example, fiscal incentives beyond those announced in Budget 2014 and discussed in an.

North Sea oil

The and were also discovered in 1979. The conditions also make extraction a costly process; by the 1980s, costs for developing new methods and technologies to make the process both efficient and safe, far exceeded 's budget to land a man on the moon. So it set up the snappily-titled Government Pension Fund Global, which would not only help it meet the needs of its ageing population for generations to come, but also boost its economy in times of uncertainty.

Can the North Sea Survive the Oil Crash?

Oil and gas extraction alone was worth an estimated £8. The following year, Shell Expro discovered the giant in the northern North Sea east of Shetland in Scotland and the Petronord Group discovered the.

The Danish Government initiates strategy for the North Sea

More than 50 years after drillers struck oil at the Forties field, setting the stage for decades of booming oil and gas production, the North Sea industry is at a crossroads. The country targets cutting carbon emissions by 70% in 2030, compared with 1990 levels. M 14: Geology of Giant Petroleum Fields.

North Sea oil

But it is worth exploring.

North Sea oil rigs set to be abandoned while still full of crude oil and chemicals

The UK has that between 2016 and 2022 petroleum revenue tax will result in a net loss to the exchequer of £500 million a year. The UK Government has vowed to support the North Sea oil and gas industry make the transition to net zero in its long-awaited. Mitch Flegg, chief executive of gas-focused Serica Energy, which bought wells from BP, says his company has cut flaring, and is keen to do more.
