Conversations on chemistry : in which the elements of that science are familiarly explained and illustrated by experiments and plates : to which are added, some late discoveries on the subject of the fixed alkalies : Marcet, Mrs. (Jane Haldimand), 1769

If you wish to charge a fee or distribute a Project Gutenberg-tm electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from both the Project Gutenberg Literary Archive Foundation and Michael Hart, the owner of the Project Gutenberg-tm trademark. It is like taking the cat in your lap after holding a squirrel.

Conversations on chemistry : in which the elements of that science are familiarly explained and illustrated by experiments and plates : to which are added, some late discoveries on the subject of the fixed alkalies : Marcet, Mrs. (Jane Haldimand), 1769

To examine the question, we must for the moment forget our admiration of Abernethy — be no longer dazzled by his genius, but look only to our duty — endeavor to discover his defects, or, rather, those of the state of the question when he left us, and see what further investigation has afforded in aid of supplying them. It is true, a rock composed of pure hornblende may be called trap, but it is not true, vice versa, that this rock, considered in its character of a simple mineral, is called trap. If we must retain names so defective, it would be very practicable to combine them with something which should indicate that we had at least looked for the cause.

Principles of Geology: A Secular Fissure in Scientific Knowledge

. Abernethy, as we have said, advocated similar views, and, we repeat, founded his reason for so doing on what he conceived to be the necessity

of explaining Mr. Now, Terraitorr, yield or die! There is another and very promising field for experiment, the Digitized by VjOOQ IC 1863.

ACS Symposium Series (ACS Publications)

Are people naturally right or left-handed 7 Many persons are naturally either right or left-handed ; but most can and should learn to use either hand with equal facility.

Catalog Record: Conversations on chemistry, in which the...

This law, however, though generally, is not universally true. Even if it have the third vowel as its centre, it does not soon betray it. If he were about to describe a bone, or any thing which he knew to be difficult, he would adopt a tone more like that in which a man would teach it to himself than describe it to others.

Lectures on the applications of chemistry and geology to agriculture ... By Jas. F. W. Johnston ...

Anybody can see who is going to win,—perhaps. This is the method of description which has been, as we think, happily adopted, to a great extent by Mr.
