Sundarbans, Bangladesh

If you plan accordingly, on a Safari on a new moon night, you will see the waters lit up like blue fairy lights. The forest in India is divided into the Sundarbans Tiger Reserve and 24 Parganas South Forest Division, and together with the forest in Bangladesh is the only mangrove forest in the world where tigers are found. Fauna: Glowing Phytoplanktons: If you are taking a night safari through the waters, be prepared to behold the rare sight of a magical starry night, both underneath as well as above you.

Sundarbans, Bangladesh

Only drawback is the infrastructures around this location and I must say the government must increase their investment to make it world class destination. Species involved in the succession pattern of the Oligohaline and Mesohaline zones.

Tigers in the Sundarbans

These two species of cats with piscivorous food habits are excellent swimmers and have partially palmate front legs and long nails and hooks that, even if they are retracted, always stick out with their tips from their casing. We saw crocodiles, monkeys, deers, wildboars and many types of birds.

Sundarbans (West Bengal)

Armstrong and Boatman 1967 measured oxygen diffusion rate ODR in a small valley bog flushed by a small stream supporting the healthy growth of *Molinia* sp. The exclusively Old World fruit bats often occur in mangrove forests in vast numbers: Roosts of an estimated 220,000 individuals have been recorded.

Sundarbans: World largest mangrove forest

Stretching across part of southwestern Bangladesh and southeastern India, the Sundarbans is the largest remaining tract of mangrove forest in the world. The Sundarbans delta in India has been a priority region for WWF-India since 1973 due to its unique biodiversity. *Avicennia marina*, *Avicennia alba*, and *Avicennia officinalis* are the dominating mangroves found in the Sundarbans.

About Sundarbans

Unfortunately, I couldn't see so many animals because of the rainy season. Fishes: Numerous rivers and creeks wind through the forests of Sundarban, and an abundance of fish and crustaceans is found in the flowing waters.

Sundarbans (Khulna City)

Many of them were attacked by the tigers. Reach Gosaba and explore the villages around the forests.
