Stained glass birds: bird suncatchers

They can produce a range of colours from -red to yellow.

Stained Glass Terminology

The first step is to know what you want to make! After the First World War, stained glass window memorials were a popular choice among wealthier families, examples can be found in churches across the UK. Once this method was found for making red glass, other colours were made this way as well. Windows within a building may be thematic, for example: within a church — episodes from the ; within a parliament building — shields of the constituencies; within a college hall — figures representing the arts and sciences; or within a home — flora, fauna, or landscape.

Stained glass

.

Stained glass

It continues to be Britain's only organisation devoted exclusively to the art and craft of stained glass. It's easy to let the copper foil tape get off-centered here and there, so pay special attention to keeping it all even.

Fritted glass

Using a ruler, align your glass cutter so that the wheel is aligned over the line you are trying to cut.

Stained Glass Terminology

It will assist the fracturing of the glass.
