Still, trade remains an elusive and profoundly difficult area for philosophical thought. On Trade Justice is a philosophical plea for a new global deal, in continuation of, but also at appropriate distance to, post-war efforts to design a fair global-governance system in the spirit of the American New Deal of the 1930s. It exposes the breadth of Bentham's contribution and a novel analysis is introduced, using Bentham's own 'disappointment prevention principle' and his preoccupation with security as the point of departure.

Bentham's work was pivotal to the development of the international climate we now face - he coined the word 'international' - and was one of the first thinkers to consider the globalized community that we see before us. This book is written in the tradition of contemporary analytical philosophy

but also puts its subject into a historical perspective to motivate its relevance.
