Cowichan Lake Research Station Conference Centre Tours & Recreation

If it had been any other time of year, Marsh claimed he could quite easily run the store by himself. Long-term permanent forest productivity plots at the station contribute to understanding coastal stand dynamics and stand development modelling. Max Marsh has been working at the station for slightly more than two months.

Cowichan Lake Forest Research Station

If staying after 3:30 p.

Cowichan Lake Research Station Conference Centre

That same year a work camp was established to house conscientious objectors to war. The nursery area, forest area, and clone banks and archives area are available for general interest tours. Extensive studies of fertilizing and thinning coastal Douglas-fir and western hemlock: an establishment report.

Cowichan Lake Research Station Conference Centre Tours & Recreation

Growth and yield data from commercial thinning experiments is a vital source of data for the calibration and validation of stand growth prediction models. Abstract In 1929, the Forest Branch of the British Columbia Ministry of Lands designated land for a forest experiment station on the south shore of Cowichan Lake. Thinning lodgepole pine in southeastern British Columbia: 46-year results.

Commercial Thinning Research

There was organized recreation as well as job training activities. Tours Walking and jogging trails wind through the site.

1984, Cowichan Lake Research Station

Net basal area response nine years after fertilizing thinned and unthinned Douglas-fir.

Commercial Thinning Research

Commercial thinning can also provide harvest volume while meeting visual quality objectives and adjacency constraints.

Cowichan Lake Research Station Conference Centre Tours & Recreation

Commercial thinning likely only provides marginal increases in the cumulative merchantable volume available from a stand over a rotation. In 1935 a "Young Men's Forestry Training Plan" for the unemployed, hired sixty young men who built roads and trails, a cookhouse, bunk houses and a station residence, including a telephone service and a water system.
