Rural Development ... Sustainable Development Knowledge Platform

Discrimination remains a persistent driver of inequality. Family programme in India have not yielded the desired results.

Rural development

Co-operative is a vital issue in every community in this world. As populations and economies grow, and climate change affects natural resources, constraints on available land and natural resources may arise.

Rural Development ... Sustainable Development Knowledge Platform

In rural areas most of the people depend on the agriculture for their livelihood and this situation makes them unemployable as they are lacking the modern techniques of agriculture. USDA Rural Development has taken a number of immediate actions to help rural residents, businesses, and communities affected by the COVID-19 outbreak.

Need of Skill Development for Rural Youths

In that context: i Increase public and private investments in infrastructure in rural areas, including roads, waterways and transport systems, storage and market facilities, livestock facilities, irrigation systems, affordable housing, water supply and sanitation services, electrification facilities, and information and communications networks; ii Improve access to reliable and affordable energy services, including renewable and alternative sources of energy for sustainable rural development; iii Enhance access of rural populations to safe drinking water and adequate sanitation; iv Develop and improve access of rural populations to information and communications technologies, inter alia, to support Internet access and build capacities for an effective use of these technologies; v Develop rural public and private services that realize the potential of those technologies, including cellular banking and extension services; vi Promote the development of rural organizations such as community-driven cooperatives to enhance investment in essential infrastructure and services, and recognize the role of urban areas in fostering rural development; vii Support improved access for all to strengthened rural health-care services and facilities; d Stimulate the creation of new jobs and income opportunities in rural areas. Providing these intermediaries with up-to-date information at the ready is important.

Challenges facing the development of rural areas in transition countries

Rural development : principles and practice 1.
