Research Projects

Handler, in , 2014 Office of Science The Office of Science within the DOE manages fundamental research programs in basic energy sciences, biological and environmental sciences, and computational science.

Environmental Research

The results from the Beowulf project enable new possibilities for low-cost super-computing that are beneficial to the academic research environment.

Research Environment

As such, the current needs of a large international scientific collaboration are likely to be much more complex than those of the lone humanities researcher, wishing to collaborate more effectively with a handful of colleagues worldwide in the same domain of interest. Animals are an endless source of wonder for children, fostering a caring attitude and sense of responsibility towards living things.

Young Children's Relationship with Nature: Its Importance to Children's Development and the Earth's Future

Participants were sought for the survey using a snowball approach with participants from the second phase contacting additional project professionals.
