Synthesis of heterocyclic compounds Research Papers

By exploring different sites of reactivity, a variety of cycloaddition reactions have been developed to construct diverse synthetically and biologically important heterocycles as well as α -amino acid derivatives bearing quaternary carbons. *Angewandte Chemie* 2016, 128 5, 1852-1856.

Recent Advances in Oxazolone Chemistry

For example, the derivatives of EDTA based structure showed that isoelectric point pI did not affected by the presence of negative charge compared with its zero charge. ~ We now report a new convenient method for the synthesis of azlactones. On reaction with ethyl bromoacetate in the presence of anhydrous K₂CO₃ under microwave irradiation MWI, these yielded corresponding esters 2a-d which on hydrazinolysis under MWI produced 5-alkyl-1,3,4-thiadiazol-2-yl sulfanyl acetohydrazides 3a-d.

Three Distinct Reactions of 3,4

Synthesis of 3,4-Dihydroisoquinolines by Cyclization of 1-Bromo-2- isocyanoalkyl benzenes with Butyllithium.

Cyclocondensation Reactions of Heterocyclic Carbonyl Compounds VIII, Heterocyclic Communications

It was established that only NH 2-nucleophilic center of 3-amino-5-methylisoxazole takes part in the heterocyclizations with pyruvic acid derivatives. This chapter discusses the significant recent advances in oxazolone chemistry.

Three Distinct Reactions of 3,4

ChemistrySelect 2016, 1 11, 2960-2962. Arylaldehydes along with hippuric acid when subjected to microwave irradiation MWI at 2450 MHz for 1. Bicyclic 6-6 Systems with One Bridgehead Ring Junction Nitrogen Atom: No Extra Heteroatom.
