## Opportunities to protect instream flows and wetland uses of water in Florida

Fish and Wildlife Service 830 0 a Biological report Washington, D.

## Opportunities to protect instream flows in Maine

This document combines the efforts of several individuals, agencies, and organizations toward a common objective: the identification, description, and preliminary evaluation of promising opportunities for protecting instream uses of water under existing laws in Florida. Headwaters: A Collaborative Conservation Plan for the Town of Sanford The headwaters of five rivers in southern Maine that drain into two National Estuarine Research Reserves and a National Wildlife Refuge fall within the boundaries of the Town of Sanford.

A general problem with instream flow studies is that the existing habitat evaluation models generate a lot of numbers, but no good systematic ways of processing data exist, especially when tradeoffs between power and habitat need to be examined. The plan identifies parcels that are critical to establishing networks of recreational trails and pathways for migratory fauna to be prioritized for conservation as community development continues in the surrounding area.

## Opportunities to protect instream flows in Maine

However, we urge the Committee to take into account the two bills the legislature passed last year: LD 1776 Public Law 559 and LD 2070. Products were developed through a collaborative process with public agencies in Minnesota and other experts, building on partnerships between The Nature Conservancy and U.
