Practice Questions

Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French university, where she earned her master's degree and doctorate in physics.

Practice Questions

Despite the clear relationship between the Byzantines and the maritime element, best reflected in the Naval Law of Rhodes, the admirable codification of shipping customs and practices of the 7 thcentury which regulated matters pertaining to the management of shipping. Despondently she recalled their close relationship and the joy that they had shared in scientific research. Together with her husband, Pierre, she discovered radium, an element widely used for treating cancer, and studied uranium and other radioactive substances.
