VEGETATION ECOLOGY AND CREATION OF NEW ENVIRONMENTS: Proceedings of the International Symposium in Tokyo and Phytogeographical Excursion through Central Honshu. by Miyaqaki, A. , et al.: Hardcover (1987)

He has recreated natural forests from degraded greenfield sites all over the world and has been given a host of awards including the Blue Planet Prize in. Written by leading experts in their field from four continents, this second edition of this book: covers the composition, structure, ecology, dynamics, diversity, biotic interactions and distribution of plant communities, with an emphasis on functional adaptations; reviews modern developments in vegetation ecology in a historical perspective; presents a coherent view on vegetation ecology while integrating population ecology, dispersal biology, soil biology, ecosystem ecology and global change studies; tackles applied aspects of vegetation ecology, including management of communities and invasive species; includes new chapters addressing the classification and mapping of vegetation, and the significance of plant functional types. Vegetation Ecology, 2nd Edition is aimed at advanced undergraduates, graduates and researchers and teachers in plant ecology, geography, forestry and nature conservation.

Vegetation ecology and creation of new environments: proceedings of the ...

The book also covers spatial analysis and predictive modeling of invasive plants.

Vegetation ecology and creation of new environments: proceedings of the ...

The book succinctly illustrates the various paths leading to high quality data suitable for pattern recognition, pattern testing, static and dynamic modelling and model testing including spatial and temporal aspects of ecosystems. Proceedings of the International Symposium in Tokyo and Phytogeographical Excursion through Central Honshu. Light DJ wear with bit of fading, edgewear, but no major tears.

It includes several stages of the social and the economic development of human society - from primitive culture of hunters to developed modern society. Now, with this new edition, he considers how the field of human ecology has changed with the latest. The book is primarily aimed at graduate students of biology but will also be of interest to post-graduate students and researchers in botany, geosciences and landscape ecology.
