#### Careers

The advantages to individual confinement include less of a risk of injury to the stallion or to other horses, controlled periods for breeding mares, greater certainty of what mares are bred when, less risk of escape or theft, and ease of access by humans.

#### Careers

When , the penis doubles in length and thickness and the increases by 3 to 4 times. The gelding of stallions is unusual, viewed culturally as either unnecessary or unnatural.

#### Careers

The other general method of managing stallions is to confine them individually, sometimes in a small with a tall fence, other times in a , or, in certain places, in a small or paddock with a strong
