Frank J. Sernasie 1932

Trudeau attempts to capitalize on all good will his government has shelled out. The highest historical level is 1.

St. Lawrence Seaway: Western Great Lakes Basin

Canada, Kingston, ON, Canada 2006. Lake Superior drains to the southwest and into St. Resource industries have become a political liability and knowledge-based investment has never had much traction here because the alternative, housing, is tax-free.

You are right, weather is not climate. Can see the oil and gas flares on the ground in a couple shots. Compare the Chrisman and Rhind articles in the special issue of *The American Cartographer* cited above.

A different world — Greater Fool

An oil and gas pipeline parallels the bottom of the lake and at the base of the bridge. At all stages of the design process feasibility study, potential

uses, and design criteria documents were submitted and thoroughly reviewed by all parties.

A different world — Greater Fool

The VAX Flatline, end of Week 6 yesterday: 3.

Canada Land Inventory

This has resulted in both 1.
