## Qnostics

Randox Engineering works to integrate supply chain processes; from supplier selection to customer approval throughout product life.

## Improving Laboratory Performance Through Quality Control

Our product portfolio offers more than 100 clinical assays, covering testing panels such as routine chemistry, lipids and cardiology, diabetes, therapeutic drugs monitoring, drugs of abuse testing, antioxidants and veterinary.

## POC Archives

A niche product from Randox, H-FABP is a highly sensitive and early risk marker of acute coronary syndrome, detectable as early as 30 minutes following the onset of an ischaemic episode. Just ask one of our 60,000 users worldwide.

## bosch Archives

Recognising out-of-control QC results using multiple rules Using a combination of multi-rules is the most effective way of recognising out-of-control events.

## Serology Controls for SARS

The Randox Lp a assay is one of the only methodologies on the market that detects the non-variable part of the Lp a molecule and therefore suffers minimal size related bias. QC is about detecting errors and ensuring that the results you produce are accurate and reliable. Randox Laboratories promises never to sell your data and we will keep all your details, safe and secure.

## Randox Engineering

This is an important factor that must be taken into consideration when deciding QC frequency.

### **QC Multi rules**

The overall objective is to obtain a high probability of error detection and a low frequency of false rejections. Additionally, participation in an ISO 17043 accredited EQA scheme will help recognise errors.
