Environmental policy of the United States

Individual goals focus on health, food and agriculture, water and sanitation, human settlements, energy, climate change, sustainable consumption and production, oceans, and terrestrial biodiversity and ecosystems. When Agenda 21 is fully realized, the United Nations will be in possession of all guns and subsequently, there will be no opposition to their control.

The US election: forecasting the environmental agenda under the Biden Administration

HUMAN FACTORS AND ENVIRONMENTAL CHANGE To date, human factors, as a profession, has not focused much on the problem of environmental change, at least as that problem is conceived here. The objective of the Forum was to provide a platform for stakeholders to discuss the environment and energy Goals in detail and enable all participants to develop a more comprehensive understanding of work underway across all sectors that gives effect to the Goals. An environmentally beneficial objective, therefore, is to enhance the attractiveness of public transportation so that it will more often be the preferred means of transport, especially in major urban areas.
