Your Kitten: What to Expect at 8 to 12 Weeks

They will be less dependent on their mother and begin to explore their basic instincts and survival abilities, but they still need to wait for about 4 weeks before they can become fully independent. Open her carrier and place it nearby along with her food, water bowls, litter box and toys.

Kitten Care: Must

Instinct tells her to find a quiet concealed spot, such as under a bed, behind a sofa, or inside a kitchen cabinet. For any action at law or in equity relating to the arbitration provision of these Terms of Use, you agree to resolve any dispute you have with Blue Buffalo exclusively in a state or federal court located in Connecticut, and to submit to the personal jurisdiction of the courts located in Connecticut for the purpose of litigating all such disputes. However, the fact the kitten is sneezing is of concern, as the kitten may have caught a disease such as cat flu or some other upper respiratory infection.

How to Take Care of Kittens

In accordance with the law of 8th December 1992, you can access the database containing your personal data and modify this information at any time by contacting Link to Media. She graduated from the University of Glasgow in 1987 with a degree in veterinary medicine and surgery. If you have a 7-week old kitten to care, there are only two possible reasons why you have one.

Kitten Care: Must

If all siblings play nice, reinforce their good behavior with well-deserved treats.

General Cat Care

Also, never leave playtime unsupervised until Kitty is full-grown.

How To Care For A Newborn Kitten

Behavior Changes Those first wobbly movements your kitten took will shift into high gear as he begins real kitten play, from jumping and pouncing to stalking and running in an imitation of his larger ancestors.
