Guide to Graduate Studies in Ornithology in North America

Hopefully, more will be published as time permits. Red-eared Sliders are native to the southeastern U.

SOO

Sealy, Department of Biological Sciences: Behavioral and evolutionary interactions between parasitic cowbirds and their passerine hosts. However, such records are lacking for many sites in Oregon.

John Rakestraw

Because the other issues were in word processing files WordStar 4 that were hard to convert to HTML or PDF and a lack of time, I was not able to put them on the Internet. Ringelman, School of Renewable Natural Resources: Waterfowl ecology and management, behavioral ecology, wetlands conservation. Shorebird migration should peak within the next week.

John Rakestraw

Yellow-headed Blackbirds are common here.

Journal of Oregon Ornithology (JOO)

The goal is to try to describe the important characteristics of a site that may influence which birds may be found there. The most common shorebird on the beach that day was Sanderling. The Department of Biology is housed in 2 buildings that offer laboratories, classrooms, animal rooms, and computer facilities.
