frequency of trips and give people the option of walking, biking, or using transit rather than driving. Signed: April 15, 2013 Term: No Expiration
This MOU states the intent of the State of California and the Province of Guangdong to engage in friendly exchange and cooperation in an effort to strengthen cooperation in multiple areas, including, but not limited to, science and technological innovation, environmental conservation, and renewable and sustainable energy.

Sustainable Development

A number of unsustainable trends require urgent action: significant additional efforts are needed to curb and adapt to climate change, to decrease high energy consumption in the transport sector and to reverse the current loss of biodiversity and natural resources. As part of the environmental focus of this MOU, the Parties agree to promote dialogue, technical exchange, and joint projects in climate change mitigation and adaptation policies, air quality, forest management, water quality and management, and the promotion of clean technologies.

Local Energy Action: EU Good Practices: Directorate

In order to boost economic development, sustainability, and resilience the MOU focuses on specific areas of cooperation including, but not limited to, the following sectors: environmental protection; clean mobility; energy production and storage; demand flexibility and energy efficiency codes and standards for buildings and appliances; water production, distribution, and conservation; and logistics and smart cities. Signed: March 28, 2014 Term: 5 years The objective of this MOU is to explore potential future collaboration among the Participants in the field of energy sector planning from various perspectives, including but not limited to providing energy access to all, ensuring affordability, enhancing energy security, and meeting environmental goals.

Local Energy Action: EU Good Practices: Directorate

Sustainable Development

Well-planned communities with a balance of housing, jobs, shopping, schools and recreation can reduce the length and

The renewed EU SDS set out a single, coherent strategy on how the EU will more effectively live up to its long-standing commitment to meet the challenges of sustainable development. First, energy is used to convey, pump, distribute, treat and heat water, so saving water saves energy. Signed: November 11, 2016 Term: 3 years This MOU focuses on sharing knowledge and good practices with other territories and cities to advance sustainable, low-carbon development strategies, tools, and practices consistent with the goal of limiting global warming well below 2 degrees Celsius above pre-industrial levels and to pursue efforts to limit the temperature increase even further, to 1.

Sustainable Development

Signed: November 18, 2008 Term: No Expiration On November 18, 2008, the U. Signed: June 9, 2017 Term: 5 years The objective of this MOU is to encourage future collaboration on energy storage between the Participants on the basis of equality and mutual benefit.
