

Problem of acid mine drainage in the province of Ontario

Special Projects Section (Mining), Industrial Wastes Branch, Ministry of the Environment - Prediction of Acid Mine Drainage Generation Potential of A Copper Mine Tailings Using Gene Expression Programming

Description: -

- Italy -- Antiques.

Italy -- Languages -- Pre-Italic.

Inscriptions -- Italy.

Mines and mineral resources -- Ontario.

Mine drainage -- Ontario.problem of acid mine drainage in the province of Ontario

-problem of acid mine drainage in the province of Ontario

Notes: Includes bibliographical references.

This edition was published in 1972

Pre

The company operated an interim water treatment facility for nine months in 2012 prior to going bankrupt.

Tulsequah Chief creditors delay cleanup of contaminated mine site

Rocks stained by acid mine drainage on Acid mine drainage, acid and metalliferous drainage AMD , or acid rock drainage ARD is the outflow of water from or. Geobiological feedbacks and the evolution of thermoacidophiles. An Ontario court case has picked an end date for the receivership process for Chieftain Metals, the beleaguered former owner of the Tulsequah Chief Mine.

Pre

This article is cited by 355 publications. The ratio of waste to metal recovered in gold mining is vastly disproportionate: the Fimiston Super Pit, near the West Australian town of Kalgoorlie, and until recently the largest open cut mine in the world, has returned approximately 1,640 tonnes of gold since operations began there in 1989. Gene expression programming: a new adaptive algorithm for solving problems.

Environmental Code of Practice for metal mines: appendix 1

The results obtained also reveal that GEP can be applied as a new-fangled method in order to predict the AMD generation process. Chemical Dissolution of Pt 111 during Potential Cycling under Negative pH Conditions Studied by Operando X-ray Photoelectron Spectroscopy. Waste water from a gold mine flows into the forest.
