In 2003, TFO produced and aired , the first Franco-Ontarian. However, Northeastern Ontario is the region that has the highest proportion of francophones, with the 122,360 francophone residents of the region making up 22. The productivity gains being realized have had and are still having a considerable impact on the level and structure of employment: a significant reduction of the labour force in manufacturing and in clerical and low-ranking specialized jobs in the tertiary sector.

Ontario First Nation aims to stop De Beers landfill plan; Ring of Fire moratorium declared

Men, women and children were hired for low wages in return for long hours of work in poor and unsafe conditions. Modernizing the Mining Act MAM The origins of the Mining Act date back to the 19 th century. This has the effect of reducing the use of French as a first language in the province, and thereby limiting the growth of the Franco-Ontarian community.
