Turnout times: How important is time of day?

This study was funded by a grant from the National Institutes of Health, National Institute of Arthritis and Musculoskeletal and Skin Diseases, grant 1 RO1 AR45901-02.

Species: Quercus turbinella

Details of all complications will be collected and recorded as detailed on a clinical events form. Naturally occurring fires typically burned their natural courses. A fire history of the savanna systems in the Kruger National Park, South Africa between 1941 and 1996.

Species: Quercus turbinella

Forced hot air, generated by an oil burner, was used to heat the soil in the cylinder. Therefore, a cost breakdown using the interagency Work Breakdown Structure WBS is not provided in this report. Informed consent The patient must personally sign and date the latest approved version of the Informed Consent form before any study specific procedures are performed.

A dose

Wildland fire dynamics in the chaparral of southern California and northern Baja California. The ACL SNNAP trial will aim to address the gap in the evidence base regarding the clinical and cost effectiveness of two routine management approaches, non-surgical rehabilitation and surgical reconstruction, and inform standards of care for patients with non-acute ACL deficiency.

Prescribed moorland burning meets good practice guidelines: A monitoring case study using aerial photography in the Peak District, UK

Eligible patients for the study will present with non-acute ACL deficiency; that is, they have recovered from any acute symptoms relating to their initial ACL injury.
