Breastmilk: A Critical Source of Vitamin A for Infants and Young Children

The opinions expressed herein are those of the authors and do not necessarily reflect the views of USAID. Partnership with industry has been successful in implementing triple-fortified instant noodles in the market. Underestimation of prevalence is possible.

Prevention and Control of Anemia: Thailand Experiences

Maternal vitamin A status and its importance in infancy and early childhood.

Breastmilk: A Critical Source of Vitamin A for Infants and Young Children

Vitamin A intake of a breastfed child depends on the vitamin A status of the mother, the stage of lactation, and the quantity of breastmilk consumed. The current program is focused on iron supplementation.

Breastmilk: A Critical Source of Vitamin A for Infants and Young Children

The two products that have already been launched with the joint efforts of public, private and academic sectors, comprise a model for further development and promotion of fortified foods to address iron deficiency and anemia for all age groups. The new goal specified a certain percentage reduction in the prevalence of anemia among both pregnant women and school children.

Breastmilk: A Critical Source of Vitamin A for Infants and Young Children

The amount required is estimated from the prevalence of anemia and the potential number of pregnant women and children. Due to possible bias in collecting data from the routine health system, a national representative sample survey may be conducted periodically with inclusion of other important groups, namely, infants, young children and adolescents.
