If 84 THE ICE AGE IN CANADA. The undulating landscape has innumerable lakes, ponds and wetlands and stratified sediments up to 100 km 62 mi long. .

### Alessandro Ielpi

Specimens from the Clyde le ls are perfectly identical with ours. It is to be observed, however, that the shells of Ilalani are composed of a remarkably dense and indestructible calcium carbonate, much less perishable than the shells of most moUusks. Image from: The Pleistocene Epoch  
The Pleistocene epoch began about 2,588,000 years ago - that is a little older than two and a half million years ago - and ended about 11,700 years ago.

### Alessandro Ielpi

In northwestern Baffin Island and in the islands to the north, flat-lying sedimentary beds overlie the granites and gneisses. Etymology Name formality Formal Usage information Celestial body Regional usage Global Time scale s used ICS Time Scale Definition Chronological unit Stratigraphic unit Time span formality Formal Lower boundary definition Base of the Thvera magnetic event C3n. A second leading point to which 1 would direct atten- tion is the relative value of hind ice and water-borne ice as causes of geological change in the Pleistocene.

## Problems of the Pleistocene epoch and Arctic area (Book, 1959) [styleguide.expo.io]

In rodents did well, while distribution declined. Blue clay with stones 1,S » 9.

## Ontario: The Geology of Isostatic Rebound

Wilson: Geology of Arctic Canada the answer is no longer problematical, for in Canada several mining areas and one oil field are already in economic production in the subarctic close to the border of the arctic regions and it is only a matter of time until some of the mineral resources known to occur in the Arctic are brought into production also. It has been shown that no universal or even general disturbance nor stratigraphic break marks the close of pre-Cambrian time.

**Geology of Arctic Canada : Encyclopedia Arctica Volume 1: Geology and Allied Subjects**

Over this is a thick bed of stratified sand and gravel filled with *Saxicam rugosa* and *TdUna*. Lawrence, very common 30 to.

**Geology of the Arctic: Proceedings of the First International Symposium on Arctic Geology (Vol. 1) on JSTOR**

Whiteaves and referred by him to A. Fossil — Vancouver Island Dr.
