### Flammable Materials

It is important to check with local jurisdictions to confirm which laws are relevant to your industry and location. The bottom of the cabinet shall be liquid-tight to a height of at least two inches. The weak roof-to-shell seam shall be constructed to fail preferential to any other seam.

### NFPA 30 and Safe Flammable Liquids Storage

Piles or groups of containers shall not be nearer than 20 feet to a building.

### Bulk Storage and Shipping of Liquid Hydrogen is Hazardous

Dispensing units shall in all cases be at least 20 feet 6. Do you have large diameter funnels to transfer liquids into drums? Also up to 18 inches 45. Liquids having flash points below ambient storage temperatures generally display a rapid rate of flame spread over the surface of the liquid, since it is not necessary for the heat of the fire to expend its energy in heating the liquid to generate more vapor.
