Nuclear Darkness

Although clearly consistent and large scale power generation from a single plant has its benefits for energy security. To start, all nuclear-armed states should reaffirm the 1985 pledge made by Soviet leader Mikhail Gorbachev and U.

6 Human and Environmental Effects

When do we want it? The proliferation process is also risky, MIT nuclear expert Vipin Narang told me, because seeking a nuke makes a country a potential target. It got warmer by 5 degrees Fahrenheit, not colder by 5 degrees Fahrenheit.

NASA

At least 75% of landmine victims are civilians.

Top Scientists Slam and Ridicule UN IPCC Climate Report

Last month, the United Nations came together, following discussions that included the possibility of global nuclear disarmament. A qualitative global nuclear arms race is now underway. When do we want it? So, in adapting to the consequences of climate change, how can we be sure that we aren't making problems worse? Limiting climate change would require substantial and sustained reductions in greenhouse gas emissions which, together with adaptation, can limit climate change risks.
