Webcams

Volcanoes on the ocean floor become islands when the mountains become so large they rise above the surface of the ocean. All webcams are courtesy Kīlauea - Summit Cams Kīlauea is the youngest and most active volcano on the island of Hawai'i, with a consistently active summit caldera that frequently hosts lava lake-style eruptions.

Volcanoes

Volcanoes are found on both land and the ocean floor. Eruptions can occur through a main opening at the top of the volcano or through vents that form on the sides. Webcam This image is from a research camera positioned on the south rim of Moku'āweoweo, Mauna Loa's summit caldera, in Hawai'i Volcanoes National Park.
