The Nursing Shortage: Solutions for the Short and Long Term

Problems may emerge based on the sheer volume of new devices, the complexity of the devices, the poor interface between multiple technologies at the bedside, and the haphazard introduction of new devices at the bedside. Equipment fairs are one strategy to allow staff the opportunity to evaluate which brand or model of technology would work best in their setting.

Advocating Globally to Shape Policy and Strengthen Nursing's Influence

Look for any patterns or repeat situations.

The Nursing Shortage: Solutions for the Short and Long Term

In 1998, she was awarded an inaugural fellowship in the Robert Wood Johnson Executive Nurse Fellows Program. They need to bring all perspectives to the policy debate; determine what the specific goal or purpose is to be; and after often-robust debate, agree and maintain that approach and position in public.

A partial list includes bed exit alarms, warnings on IV pumps that signal occlusions, patient-initiated call bells, staff-initiated code alarms, wandering and elopement alarms, cardiac monitor alarms, and ventilator alarms. If the patient handling equipment is located at the end of a hallway in a room behind other equipment, the nurse is less likely to use it than if it is stored in an open alcove in the hallway where it can easily be retrieved.

The Nursing Shortage: Solutions for the Short and Long Term

In hospitals, a 10% increase in the proportion of nurses holding BSN degrees decreased the risk of patient death and failure to rescue by 5%.

AACN Fact Sheet

Based on an action-learning approach, participants work in teams to develop and share an in-depth understanding of the challenges that are being faced, the commonalities, the successes, and the failures. Both of the methods have been used in engineering, and both are prospective in that they can be used to identify and prevent product and technology-related problems before they occur. .

DOSH

This makes good safety sense, and proper maintenance can prevent costly breakdowns and undue exposures. Any pending corrective action and reason for delaying its implementation should be identified.
