Walī Allāh Aḥmad ibn ‘Abd al

As far as it is clear, most of the objections and critiques seem to come from the existing work of Rahman as well as those from the tradition of Iqbal. The two key features Yād highlights are the focus upon the soul as the true human self that in its perfect form is immaterial and hence transcends both the material and ephemeral, and the importance of the notion of being as a simple reality that is paradoxically both one and many. Il sistema delle comunicazioni terrestri richiede interventi di modernizzazione, in parte in atto.

The reprint is clearly aimed at readers of Yād because the back cover presents the front covers of his various books.

a poet and literary critic writing on stylistics, especially the prose essay, Yād was known for his inclination to philosophy and the use of philosophical argument in literary analysis.

It would have been useful to have seen a conclusion which would summarize exactly where Yāsīn thinks Mullā Ṣadrā goes wrong and what his critique is. Il ruolo strategico assunto dal P.

Our intention is merely to publish works of quality research. For no obvious reason, it reproduces the colophon of part two of volume one from the Hyderabad printing but with the dates omitted, perhaps almost as if the origins of the translation in the Osmania bureau were being eradicated.
