

Pre-Permian handbook of the Hugoton Embayment.

Liberal Geological Society - Geolex — Salem publications

Description: -

-
Petroleum -- Great Plains.
Geology -- Great Plains.
Geology -- Hugoton Embayment. Pre-Permian handbook of the Hugoton Embayment.
-Pre-Permian handbook of the Hugoton Embayment.
Notes: 1956 ed., edited by William Roy King.
This edition was published in 1962

A dynamic model for the Permian Panhandle and Hugoton fields, western Anadarko basin

Sarbudak, Significance of near-surface magnetic anomalies over Clarita prospect, Arkoma Basin, Oklahoma: Association of Petroleum Geochemical Explorationists Bulletin, v. A successful workover program should apply the fundamentals of science and engineering, coupled with field operations and geology. A nearly complete sequence of the Paleozoic rocks is recognized in the subsurface.

Geologic History of the Las Animas Arch, Colorado

Blanco, Surface geochemical exploration in the North Sea, in J.

Hugoton Hermes News

The minimum depth of each log was approximately 300 m. The authors would like to express their sincere appreciation to Mr.

A dynamic model for the Permian Panhandle and Hugoton fields, western Anadarko basin

Leythaeuser, Diffusion of methane and ethane through the reservoir cap rock: Implications for the timing and duration of catagenesis: Discussion: AAPG Bulletin, v. The authors express their gratitude to Pierre Keating for his professional editorial help and two anonymous reviewers for their suggestions that helped to improve the manuscript. Most of the newly developed production is in Pennsylvanian rocks, the Morrow sands leading in importance.

Hugoton Asset Management Project

Mature thermogenic gas generated from source rocks in southwestern Kansas and the Anadarko basin with 1. Foote, Horizontal gradient interpretation of low-altitude cesium vapor magnetometer data compared with measurement of rock magnetic susceptibility of drill cuttings, in M.

Fracture Identification In The Panoma Field Council Grove Formation

Sandy, Radiometric survey interpretation pitfalls, in R. Abu-Ali, The potential use of biogeochemistry in the detection of petroleum microseepage:

AAPG Bulletin, v. Schmitt, A review of association of petroliferous materials with uranium and other metal deposits in the United States: USGS Bulletin 1798, 18 p.

Composition and stable

Malmqvist, An iterative regression analysis procedure for numerical interpretation of regional exploration geochemical data: Mathematical geology, v. Matthews, Effects of hydrocarbon leakage on earth surface materials in M. Soliman, Geochemical prospecting for petroleum and its possible application in the Middle East: Second Arab Petroleum Congress, October 17-22, Beirut, 19 p.
