progressivity of health

Clinical practice guideline update : adult sinusitis executive summary.

Community First Choice (CFC) 1915 (k)

The null hypothesis was that the change in Kakwani index when moving from one equivalence scale to another was zero.

Understanding psychiatric institutionalization: a conceptual review

Three basic principles, among those generally accepted in our cultural tradition, are particularly relevant to the ethics of research involving human subjects: the principles of respect of persons, beneficence and justice.

progressivity of health

While margins are important for implementing the hypothetical monopolist test, high margins are not in themselves of antitrust concern. Excessive antibiotic use for acute respiratory infections in the United States. Multiple relevant product markets may thus be identified.

Community First Choice (CFC) 1915 (k)

Decreased azithromycin susceptibility of *Neisseria gonorrhoeae* isolates in patients recently treated with azithromycin. To respect autonomy is to give weight to autonomous persons' considered opinions and choices while refraining from obstructing their actions unless they are clearly detrimental to others. The purpose of medical or behavioral practice is to provide diagnosis, preventive treatment or therapy to particular individuals.

Update to CDC's Treatment Guidelines for Gonococcal Infection, 2020

A similar conclusion is reached with regard to using equivalence scale 3 instead of scale 1. However, only those papers were included that did not meet any of the following two exclusion criteria: First, papers were excluded if studies about psychiatric hospitals were not based in countries that had experienced major mental health care reforms involving deinstitutionalization during the second half of the 20 th century. Various elements of the entry effort will be considered.
