A Multiple

The Annals is the official organ of the Council of American Instructors of the Deaf CAID and of the Conference of Educational Administrators of

Schools and Programs for the Deaf CEASD and is directed and administered by a Joint Annals Administrative Committee made up of members of the executive committees of both of these organizations. Results were analyzed separately for four different response modes: the oral productions of OA children, the oral productions of TC children, the manual productions of TC children, and the combined productions of TC children. Results indicated that imitated speech is neither longer nor grammatically more advanced than non-imitated, spontaneous speech.

Video colour recording system : NTSC. Note Test was reviewed in The Eleventh Mental Measurements Yearbook 1992. Pre-test scores: The mean, standard deviation, and range of scores obtained at the beginning of the Project.

Grammatical analysis of elicited language. Complex sentence level. (Kit, 1980) [styleguide.expo.io]

The gap between oral and manual production of the children in total communication programs indicates that spoken English did not develop simultaneously with manually coded English and that these children educated in programs using manually coded English did not develop competence with early developing English syntax at a rate faster than those not using signs. The manual scores of TC children significantly exceeded the scores of OA children in less than 20% of the categories.
