Once you get in, you can not get out unless you dump it. This was for get request, same happens for post. Always put performance in the first place 4.

Getting Started

The tags in Figure 5-6 lack Value attributes such as the ones in Figure 5-5's tags.

Working with the Application Object

Unlike the Session object, the Application object doesn't have an Abandon method. Gradually, Microsoft started porting existing services to work with Core. .
