Interface Friction

Specific case studies were cited.

BS 8004 2015 Code of Practice for Foundations

A higher factor of safety is recommended if a failure could have a catastrophic effect on human health or the environment, and if large uncertainty exists in input parameters to calculate the factors of safety.

Geosynthetics : proceedings of the 8th International Conference on Geosynthetics, 8 ICG (Yokohama. Japan), 18

To those who doubt the viability of this claim -- or to those who worry about the accuracy about what is being claimed -- hydrofracking is really more the setting up of the next great asbestos industry -- or the establishment of an endless series of public health and benefit legal fights over what is likely a dangerous or even deadly misstatement of opportunities Pericorn, et al. Evaluation of liquefaction potential of a site located in the South of Portugal.

Monitoring of a landfill side slope lining system: Instrument selection, installation and performance

Ellis Horwood Limited publishers, 1980. Trees in relation to design.

Assessment of industrial byproducts as permeable reactive barriers fo...

Particle size, moisture content, and transmissivity are three important characteristics to consider when examining the soil to be used against a geomembrane.

1st GeoReinforcement Workshop Munich, Germany, 4

Eurocode: Basis of structural design BS EN 1991 all parts. The deficit was growing through the mid-2000s and while it is still quite large, the straight downward trend in the trade deficit has flatlined Trading Economics, 2014.
