The ACT Test Math Practice Test

Questions

Developments made in China, and only much later known in the , include , the , methods for solving systems of and the. The goal is to encourage interest in mathematics through solving worthwhile problems.

Ratios

The date of the invention of the suan pan is not certain, but the earliest written mention dates from AD 190, in Xu Yue's Supplementary Notes on the Art of Figures. Wallis publishes Arithmetica infinitorum 1658 C. Also, three geometric elements contained in the Rhind papyrus suggest the simplest of underpinnings to : 1 first and foremost, how to obtain an approximation of accurate to within less than one percent; 2 second, an ancient attempt at ; and 3 third, the earliest known use of a kind of.

History of mathematics

Franklin's kite experiment 1767 C.

Compound Interest

Topics include lines, circles, functions, limits, continuity, the derivative, rules for differentiation of algebraic, trigonometric, and the transcendental functions, related rates, mean value theorem, optimization and curve sketching, differentials, Newton's method, antiderivatives and integration, and the fundamental theorem of calculus. He also stated a special case of the , studied , and investigated the derivative of the sine function.
