Proposed Western Transmission Projects

The general route will begin in south-central Wyoming, extend through northwestern Colorado and central Utah, turn southwest into southern Nevada, and end near Las Vegas.

Proposed Western Transmission Projects

. Under development since 2005, the transmission line is anticipated to begin construction in 2013.

☐ 2018 Top 10 Transmission Projects ☐

This project will help supply energy to customers and improve electric system reliability by enabling delivery of electricity from existing and new generating resources, including renewable resources such as wind. Along with the construction of the DC line, the project will include the construction of a converter terminal in New Hampshire to convert the electricity from direct current DC to alternating current AC, as well as the construction of a new AC transmission line to deliver the electricity to consumers throughout New England. Developers: , The Southline Transmission Project is a proposed transmission line designed to connect and transmit electricity across southern Arizona and southern New Mexico.

Proposed Western Transmission Projects

Key benefits include enhanced ability to import power from the upper Midwest and delivery and integration of renewable generation. The 145-mile line would follow a corridor owned by CMP from Beattie Township, on the Canadian border north of Route 27 and Coburn Gore, through Farmington and Jay to Lewiston, where it would connect to the regional electric grid. Our IRP identifies a need for more transmission lines to deliver electricity from new generating resources.

Transmission Projects

Developers: , , , This project is proposed by.

Proposed Western Transmission Projects

This process includes long-range planning to ensure our transmission system integrates well with other utility systems in the Western Electricity Coordinating Council WECC. Developers: , In order to connect the proposed Wind Catcher facility, n is proposing to build a 350 mile, 765 kV transmission line to deliver power from the Oklahoma Panhandle to Tulsa.
