DFID/SDD

Focussing on frameworks only, we found 15 that focussed on health, health systems and development. You will want to choose a topic that is interesting to you, and a topic that would be of interest to your potential audience.

QHRC : Case studies

A review of gender-integrated interventions in reproductive and maternal-child health, for example, found that while the effects of integrating gender into interventions were mixed, overall the studies suggested that addressing social and structural factors within maternal and child health interventions, such as gender norms and inequalities, is beneficial for effective intervention outcomes. Insufficient integration of gender in policies, small gender budget allocations that fluctuate over time, and commitment of budgets to superficial gender activities are perceived to be a result of failure to prioritize gender in policy planning and intervention delivery.

Institutions, Relations and Outcomes: A Framework and Case Studies for Gender

Due to having no money, mothers decide to use TBAs group discussion with older mothers, Kamuli.

Flexible Working, Work

Professional men with and without children seem to increase their unpaid overtime hours especially when they have a lot of schedule control, while professional women with children do not. Health workers who are often female themselves therefore often harass men who are unable to do so. As the above findings indicate, these social norms can sometimes be so strong both within the household and community that even when women are heavily pregnant or unwell, they are still expected to undertake housework.

Institutions, Relations, and Outcomes: A Framework and Case Studies for ...

Incorporating gender analysis into HSR should ideally be done at all stages of the research process. At the household and community level, interventions are needed, for example, which challenge norms that view men as sole providers and women as care givers. Competing devotions: Career and family among women executives.

Utilization of the DIMEFIL Framework in a Case Study Analysis of Security Cooperation Success

Female respondents were further disaggregated by age younger mothers aged 15-25 and older mothers aged 26-55. What questions are required to analyze the problem? Control over when to work in addition to working from home is also only partly related to less work—family conflict Michel et al.

Institutions, Relations, and Outcomes: A Framework and Case Studies for ...

Other organizational methods can be utilized, such as Microsoft Excel, but a physical notebook should always be kept as well.

How to do (or not to do)... gender analysis in health systems research

Defining Flexible Working, Discrepancies Between Arrangements Another limitation of previous research is the way flexible working is operationalised.
