Crompton, Samuel (1753

Overland transportation was extremely difficult, as road arteries had improved only slightly over Roman times. In England the Industrial Revolution was already gathering force, but in America it was merely a matter of rounding out and perfecting a preindustrial technology to form the basis of a more independent American society. How he discharged the duties of his sacred office and of a Magistrate the unfeigned sorrow for his loss amply testified.

It is often said that this development made such an improvement in weaving that a shortage of yarn developed, which led to improvements in

spinning and again put pressure on weaving until the introduction of the power loom.
