

Mosbys review questions for NCLEX-RN

Mosby - Mosby S Review Questions For Nclex Rn Mosbyrq

Description: -

A few NCLEX questions-all 7 questions are from Mosby's Comprehensive Review of Nursing for the NCLEX-RN examination- 20th edition - by Nugent et al.

Page 738-739 The school nurse is planning to teach a class about nutrition. Which age group will be most receptive to this information?

- a) 6 year old children
- b) 8 year old children
- c) 11 year old children
- d) 15 year old children

a) 6 year old children-6 year old children are just beginning to experience the developmental goals of the school-age child. They are not ready to make choices based on what they have learned.

b) 8 year old children-8 year old children are beginning to achieve a sense of industry and accomplishment. They are in Piaget's stage of concrete operations wherein they are able to use their thought processes to experience actions. Their growing independence enables them to make decisions based on what they have learned.

c) 11 year old children-pre-adolescents are beginning to assert their independence and probably will rebel if taught what they should eat.

d) 15 year old children-adolescents need to conform to their peer group. What is learned in nutrition class will be ignored in favour of pre-established preferences.
