1998 Conference Proceedings

Materials presented are in no way meant to be a substitute for professional medical care by a qualified practitioner, nor should they be construed as such. The Soundbeam Project United Kingdom ABSTRACT Recent advances in movement sensor and other technology have utilised various electronic media to create human - machine interfaces with apparently significant but largely unexplored educational potential. Set SOUND Canvas on instrument 124 Bird.

Soundbeam 6 — Soundbeam

The four participants had some common characteristics. Activity Explain that we will be going on a Halloween walk and on that walk we will hear some Halloween sounds. Add to this that it can be used with a MIDI interface for as many sounds as you would want, and any sound-effect can be included in this, the fact that's it's recordable and can be programmed to suit any child or adult and played at any level, and you can see how exciting it is.

Soundbeam 6 — Soundbeam

I hope to see you there! Have pictures, instruments, and talker readily available. The Skoog is a soft, squeezable object that simply plugs straight into your computer or laptop's USB port. In other words it focused on the insight of the person, to his or her internal world, instead of the outside and as a result it enables the participant to address what is needed to be done and what he or she wants to be done.

Soundbeam 6 — Soundbeam

It emits an ultrasonic beam of variable range. The witches are flying everywhere.

1998 Conference Proceedings

In this way the communication partner does not create demands on the persons that they might not be able to cope with. SOUND Canvas on instrument 47 harp.

The Skoog

With conventional instruments, designed for those with average or above-average physical, mental and sensory functioning, the time gap between musical imagination and musical realisation takes years to develop. Start the tape of the music and move the client through the beam while the music plays. The latest version SOUNDBEAM 6 incorporates many of the features of both soundbeam 2 - 5.

Sound Therapy And Autism

Soundbeam is identified as a key resource by the Qualifications and Curriculum Authority in assisting children with learning disabilities to attain learning targets as prescribed by the National Curriculum for Music. The colours of the clothing of the participant and his or her movements are reflected in the pattern projected. Set transpose dial on 2.
