Telecommunications Acronyms: Full List

Part of the low band i. SCANNER A radio receiver that moves across a wide range of radio frequencies and allows audiences to listen to any of the frequencies. At the headend, the electrical signal is translated into an optical signal and sent through the fiber.

NCTI

The board may adopt less stringent criteria for employers with few employees and for employers in industries with insignificant occupational safety or health hazards.

A Complete Guide to Fiber Optic Internet

A network allows sharing of network and computing resources. The operator must furnish its legal name and type individual, private association, partnership, or corporation, including the Employment Identity number or the Social Security number if the company is an individual or partnership; the assumed name, if any; the mailing address; the nature of the operational status change; and the names of the communities affected and their FCC community unit identifier numbers.

NCTI

A SMATV system is a video distribution system that does not use any public rights-of-way. An important function is the sharing of Internet access, often a broadband service through a cable TV or DSL provider.
